**Repair 4**  
Using 2 screwdrivers and a hammer to continue to pry deck off. First screwdriver lifted up near the edge, the second screwdriver lifted up the rest of the lip all the way inside (it was dragged along by the first screwdriver).

Repair 5  
 Prying deck up. I loosened it as far forward as the daggerboard well, but stopped there as it seems that the deck is attached to the daggerboard well, and I'm not sure how to loosen it there.
