

Laser® Practice Sails by APS

Laser® Practice Sails

Standard, Radial or 4.7
NOT class legal

We worked with top sail makers to produce the best Laser® Practice sails available. These are cut to class specifications but made of slightly heavier 3.8oz cloth for durability and a longer life. Each sail includes a window and a APS envelope sail bag. Save your expensive class sails for the big events . You will not find a better Laser® practice sail anywhere.

Practice sails include FREE APS digital "8s" sail numbers. As a bonus we also include a FREE APS Pro Clew Strap and a set of APS practice battens.

European sail numbers can be purchased separately if desired.

Laser® Practice Sails

Laser Practice Sails

Standard, Radial or 4.7
NOT Class Legal

Don't mess around with your good race sail when you're just going out to practice some roll tacks or enjoy a quick sail.

The Laser® training sails are made of an extra heavy 4.5 oz white Dacron sailcloth that provides a more durable sail for the extra beating that practice can provide.

This sail has six panels and heavy duty reinforcements in the corners and includes battens and sail bag.

Please note that these sails are not race legal -- the Laser Class has not certified them and they do not meet class specifications. They are for use during practices only.

Laser® Standard

Colors above are for size comparison use only.

These are class legal Laser® Racing Sails, complete with class button and sailbag (battens are not included). You have the choice of a Laser Standard sail by either North Sails (constructed in Sri Lanka) or Hyde Sailmakers.

APS offers all Laser sailors who purchase a new sail FREE sail numbers (letter for the country code are not included). When ordering sail numbers, class rules specify that you use contrasting colors for the first two numbers and the final four sail numbers (i.e. - **123456** or **123456**).

Use the part #'s SAILNUMPRE & SAILNUMDIG to specify the type of sail numbers you would like included, and be sure to fill in the necessary information for either choice when adding it to your order.

We can also install your sail numbers for an additional cost. This will add 1-2 business days to your order process time. Just add the part#: SAILNUMBERS below, and be sure to specify the color and numbers that you need!

Laser® 4.7

Colors above are for size comparison use only.

The 4.7 sail is perfect for sailors weighing between 110lbs. and 140lbs, and aren't quite big enough for the Radial yet. This is a class legal Laser® 4.7 Racing Sail, complete with class button and sailbag (battens are not included).

APS offers all Laser® sailors who purchase a new sail FREE sail numbers (letter for the country code are not included). When ordering sail numbers, class rules specify that you use contrasting colors for the first two numbers and the final four sail numbers (i.e. - **123456** or **123456**).
